

October 4, 2004

My name is Nate Wassermann. I also am a part owner on the Tavern Owners land on Laguna Avenue. In your Urban plan there are A parcels being designated as housing and B parcels are designated as green and open space. The initial plan shows us as green open space. This is all the property we have and if you take our land, then we are making it possible for other developers to potentially make millions of dollars per acre in the future. You are denying us that right! We must share the future profits. We are sacrificing our land so that the developers can profit in the future. Government should not be in the business of picking winners and losers

Thank you,
